

I am a dedicated Web Developer with hands-on experience in building responsive, full-stack web applications. My expertise bridges the gap between frontend and backend, using HTML, CSS, JavaScript, and Tailwind CSS to craft modern, mobile-first interfaces. On the server side, I utilize Node.js and Express.js to develop robust logic and scalable APIs. I am committed to writing clean, optimized code and rely on Git and GitHub for efficient version control, ensuring I deliver high-performance solutions while following modern web development best practices.

## Skills

- HTML
- CSS
- Tailwind CSS
- JavaScript
- Git | Github
- NodeJS
- MongoDB
- Express JS

## Education

- **Bachelors in Computer Science**  
University of Education, Multan  
2022-2026  
CGPA - (3.82/4.00)
- **Intermediate in Computer Science**  
Punjab Group of Colleges, Multan  
2020 - 2022  
Percentage - (88%)

## Projects

- **Tesla Homepage Clone**  
Built a responsive Tesla landing page using HTML, CSS, and Tailwind CSS. Focused on smooth scrolling sections, mobile responsiveness, and clean UI.
- **Currency Converter App**  
Developed a small JavaScript app that converts currencies using real-time exchange rates. Practiced DOM manipulation, event handling, and API integration.
- **Phoenix Homepage Clone**  
Developed a responsive homepage for Phoenix using HTML, CSS, and JavaScript. Practiced layout structuring, navigation, and interactive elements. Ensured cross-browser compatibility and user-friendly design.

## Work Experience

### Fiesta Digital Solutions

Refined front-end development proficiency through a structured mentorship at Fiesta Digital Solutions, gaining advanced technical insights under the direct guidance of industry experts.

## Certifications

### Front End Development
